CEDAR Cambridge

Compatibility chart for CEDAR Cambridge V7

CEDAR Cambridge V7 has been written specifically for the Microsoft Windows 7 Ultimate 64-bit operating system. It will run on Windows Vista with some limitations. Windows XP is not supported.

Appropriate drivers are not available for older motherboards, so early revisions of the CEDAR Cambridge hardware are unable to support Windows 7 Ultimate 64-bit. The following chart should be used to check for compatibility:

CEDAR Cambridge model	Windows version supplied	Windows 7 Ultimate 64-bit compatible	CEDAR Cambridge V7 compatible
Original *Feb 2003 - Jul 2006*	XP	NO	NO
'Q' dual *Aug 2006 - Feb 2009*	XP Vista	Serial numbers before PC-3-09902: NO Serial number PC-3-09902 onward (May 2007): YES	Serial numbers before PC-3-09902: NO Serial number PC-3-09902 onward (May 2007): YES
'Q' quad *Aug 2006 - Feb 2009*			
Server *Nov 2007 - Feb 2009*			
Series III *Feb 2009 - present*	Vista 7 Ultimate	YES	YES

Notes:

1. A minimum of 4GB of RAM is required to run Windows 7 and CEDAR Cambridge V7.

2. All field upgrades are at the owner's responsibility.
